NOTE:
Anything not mentioned is generally available across all channels. This overview focuses solely on the differences.

1. SPRK is a web-based booking interface provided by Lufthansa Group airlines (powered by Accelya/Farelogix).
2. Subject to market specific rollout.
3. Please consult the respective aggregator and certified technology providers for availability in your market(s).
4. NDC Public DCC amounts are valid during our initial, gradual, roll-out and will be differentiated at a later stage.
5. Subject to implementation on API provider side. If not embedded, available via SPRK.
